

Prompt para o Emergent — Foodie Frontend (Versão 1)

I want to go with **Version 1**. Below is a complete and detailed description of the entire project so that nothing is missing from the final frontend.

> ■■ **IMPORTANT — Output format:** I want **ONLY HTML and CSS**. No React, no Vue, no Angular, no JavaScript frameworks, no TypeScript, no npm packages. Pure HTML files with CSS styling only. Each page should be a standalone `.html` file with its styles included (either inline `<style>` blocks or linked `.css` files). Do not generate any JavaScript logic, backend code, or framework boilerplate.

Project Overview

Foodie is a food-focused social network where users share recipes, follow each other, join themed groups, and interact through comments, ratings, favorites, and notifications. The app is built in Portuguese (PT-PT).

The app name displayed everywhere is "**Foodie**".

Tech Stack & Design Direction

- The current backend is in **Blazor (.NET 8)** — the new frontend should be a modern React (or whatever stack Version 1 uses) that connects to the same API.
- Design language: clean, warm, food-inspired. Cards with soft shadows. Rounded corners. Bootstrap-style grid (3-column layout on desktop). Colors: predominantly white/light backgrounds with dark accents. Difficulty badges use Bootstrap semantic colors (green = easy, yellow = medium, red = hard).
- Icons: Bootstrap Icons (`bi-*`) are already used throughout — keep them or use equivalents.
- The app uses **session-based authentication** (session storage).

Authentication Flow (No Persistent Navbar)

These pages use an **empty layout** (no navbar, no sidebar — just centered content):

1. Landing Page — /

- App logo/name "Foodie" top-left.
- Tagline: *"Nada como a boa comida para juntar as pessoas"*

- Two buttons: **"Registrar"** (opens Register modal) and **"Login"** (opens Login modal).
- Illustration image on the right side.
- Footer: *"Consegues imaginar um mundo sem comida?"* + copyright.

Login Modal

- Fields: Email, Password.
- Checkbox: "Remember me".
- Error alert if credentials are wrong: *"Email ou password incorretos"*.
- On success → redirect to /feed.

Register Modal

- Fields: Username, Email, Password, Confirm Password.
 - Validation messages per field.
 - Error alert if email already exists.
 - On success → auto-login + redirect to /welcome.
-
-

2. Welcome Page — /welcome

- Centered card, full viewport height.
 - Title: "Foodie", subtitle: "Let's complete your profile".
 - Illustration image.
 - Big pill button: **"LET'S GO"** → navigates to /uploadphoto.
 - Step indicator: 2 dots — first dot active.
 - Small link below: "Skip these steps" → /feed.
-
-

3. Upload Photo — /uploadphoto

- Centered card.
 - Title: "Add a Photo", subtitle: "Help others recognize you".
 - Circle avatar preview (gray placeholder if no photo selected).
 - File input accepting images.
 - **"SAVE & CONTINUE"** button (disabled until a photo is selected) → saves photo + goes to /selectgroups.
 - Step indicator: 2 dots — both active.
 - Small link: "Skip this step" → /selectgroups.
-
-

4. Select Groups — /selectgroups

- Centered card.
- Title: "Select your groups".
- Search input: "Search group..."
- Dropdown select of all available groups (filtered by search).

- **"Join Selected Group"** button (disabled if none selected or already joined).
- Badges showing groups already joined.
- Section: "Create a new group" — text input for name + **"Create and Join"** button.
- Big dark button at bottom: **"Start using Foodie"** → /feed.

Main App Layout (with Navbar)

All pages below use the **main layout** which includes the persistent top navbar.

NavBar (Persistent — top)

The navbar has 4 main areas:

Logo — "Foodie" (bold, clickable → /feed).

Search bar — Autocomplete input that searches simultaneously across:

- ■ Recipes (navigates to /recipepage/{id})
- ■ ■ Tags (navigates to /feed/{tagId})
- ■ Users (navigates to /profilepage/{id})

Each result in the dropdown shows the emoji prefix and the name. Filtering is real-time as the user types.

Hamburger menu (dropdown, top-right area) — contains navigation links:

- ■ Home → /feed
- ■ Publicar Receita → /addrecipe
- ■ ■ Minhas Receitas → /myrecipes/{userId} (uses logged-in user's ID)
- ■ Meus Grupos → /grouppage
- ■ Favoritos → /favorites
- ■ A seguir → /feed
- ■ ■ A minha conta → /userpage (separated by a top border)
- ■ Sair (logout — clears session, redirects to /) (separated by a top border)

Notifications bell (■) — button with badge showing count of unread notifications (red badge). On click, opens a dropdown listing up to 5 notification messages. If none: "Sem notificações".

User avatar — circular image (60×60px) using the logged-in user's photo or default-avatar.svg fallback. Clickable → /profilepage.

Pages

5. Feed — /feed and /feed/{tagId}

3-column layout:

Left column:

- **"Criar Receita"** card with a plus icon → /addrecipe.
- **Featured category card**: large card with background image of Italian kitchen (cozinha-italiana.jpg), title "Descobre", subtitle "Cozinha Italiana". Clickable → /categorypage.
- **Recommended recipes list**: top 3 most-favorited recipes, each showing a small thumbnail image (60×60px, rounded) and recipe name. Clickable → /recipepage/{id}.

Center column:

- **Feed mode toggle** — two icon buttons side by side:
 - ■ (Global feed — all recipes)
 - ■ (Following feed — only recipes from followed users)
- Label below buttons: "Feed Global" or "A Seguir" depending on active mode.
- If no recipes: *"Nenhuma receita encontrada. Tenta seguir alguém!"*
- **Recipe cards** (one per recipe, max-width 540px centered):
 - Left side (col-4): recipe image (clickable → recipe detail).
 - Right side (col-8):
 - Recipe name (bold, clickable → recipe detail).
 - Row: ■ average rating | ■ favorite count.
 - Row: ■ Prep: formatted time | ■ Cook: formatted time.
 - Row: ■ X porções (if servings > 0) | Difficulty badge (green/yellow/red).
 - Author row: circular avatar (50×50) + username, both clickable → /profilepage/{userId}.

Right column:

- **"Os Meus Grupos"** card:
 - Header: "Os Meus Grupos" (link → /grouppage).
 - Body: bulleted list of groups with links → /grouppage/{groupId}.
 - If no groups: message *"Ainda não pertences a nenhum grupo."* + two buttons: "Criar Grupo" and "Procurar Grupos".
- **"As minhas tags"** card:
 - Header: "As minhas tags".
 - Body: list of user's tags, each linking to /feed/{tagId} to filter the feed.

Note: When a TagId is passed in the URL (/feed/{tagId}), the feed is filtered to only show recipes with that tag.

6. Recipe Detail — /recipepage/{id}

Two-panel layout inside a card:

Header:

- Recipe name (h3).
- Bookmark/favorite button (top-right): outline bookmark if not favorited, filled if favorited. Toggle on click.

Left panel (col-6):

- Recipe image (full width, 200px height, object-fit cover). Fallback: placeholder SVG.
- **Ingredients** list (if any).
- **Preparation/Directions** text (labeled "Preparação:").
- **Servings**: "Rendimento: X porções" (if > 0).
- **Difficulty**: "Dificuldade: Fácil / Médio / Difícil".
- **Prep time**: "Tempo de Preparação: X min / X h".
- **Cook time**: "Tempo de Cozinhar: X min / X h".
- **Tags**: displayed as blue pill badges, each clickable → /feed/{tagId}.

Right panel (col-6):

- **Author info**: circular avatar (55×55) + username. Both clickable → /profilepage/{authorId}.
- **Rating section**:
 - Text: "Experimentou esta receita? Avalie →"
 - **Star rating component** (1–5 interactive stars). Displays filled stars for current user's rating. Clicking a star saves the rating immediately.
- **Comments section** (chat-style, bottom of right panel):
 - Each comment is a bubble:
 - **Own comments**: aligned right, green background.
 - **Recipe author's comments**: aligned left, light blue background.
 - **Other users' comments**: aligned left, light gray background.
 - Each bubble shows: user circular avatar (35×35, clickable → profile), bold username (clickable → profile), message text, small timestamp (dd/MM/yyyy HH:mm).
 - **New comment input**: text input at the bottom + send icon button. Submitting on Enter key or clicking the icon sends the comment and refreshes the list.

7. Add Recipe — /addrecipe

Form inside a card with header "Publish Recipe":

Left column (col-8):

- **Title** (text input, required).
- **Directions** (textarea, 5 rows, placeholder: "Don't forget to mention quantities...").
- **Photo** (file input).
- **Servings** (number input, 1–999, required).
- **Difficulty** (dropdown: Fácil / Médio / Difícil).
- **Prep Time**: number input (1–999) + unit dropdown (Minutos / Horas).
- **Cook Time**: number input (1–999) + unit dropdown (Minutos / Horas).
- **"Publish"** button (primary style).
- Error alert if save fails.

Right column:

- **Ingredients** section:
 - Autocomplete input (searches existing ingredient names from DB) + ■ button to add.
 - List of added ingredients as dark outline pill buttons, each with an × to remove.
 - **Category/Tag** accordion:
 - Each category is an accordion item (collapsed by default) showing its description.
 - Expanding reveals checkboxes for each tag within that category.
 - Multiple tags can be selected across multiple categories.
-
-

8. Edit Recipe — /editrecipe/{id}

Same fields as Add Recipe, but pre-populated with existing data:

- Title, image upload (optional — keeps original if no new file), servings, difficulty, prep time, cook time, preparation/directions, ingredients list, tag selection.
 - **"Confirmar"** button (green, saves and redirects to /myrecipes/{userId}).
 - **"Cancelar"** button (gray, discards and redirects to /myrecipes/{userId}).
-
-

9. My Recipes — /myrecipes/{userId}

- Title: "Receitas de {username}".
 - Grid of recipe cards (2 per row, col-md-6):
 - Recipe image (left, fixed height 200px).
 - Recipe name (clickable → /recipepage/{id}).
 - Prep time and cook time.
 - **"Edit"** button (blue) → /editrecipe/{id}.
 - **"Delete"** button (red) → /deleterecipe/{id}.
 - If no recipes: "Este utilizador ainda não tem receitas publicadas."
-
-

10. Profile Page — /profilepage (own) and /profilepage/{userId} (other users)

3-column grid layout:

Left column (profile section):

- Circular profile photo (120×120).
- **Follow / Unfollow** button (only visible when viewing another user's profile):
 - "Seguir" (gray) if not following.
 - "A seguir" (green) if already following.
- Bio text: "Olá, sou {username}!"

Center column (main section):

- Username (h2).

- **Stats row** (3 boxes, center-aligned):
 - Recipe count + "Receitas"
 - Average rating + ■ + "Avaliação média" (1 decimal place)
 - Follower count + "Seguidores"
- **Publications header**: "Publicações" + "Ver Todas" link → /myrecipes/{userId}.
- **Recipe cards** (ordered newest first):
 - Each card shows: author avatar (30×30) + username + date (dd/MM/yyyy HH:mm), recipe image (full width), recipe name (bold). Entire card is clickable → /recipepage/{id}.

Right column (sidebar):

- **Grupos** section (h4): list of groups the user belongs to, each linking to /grouppage/{id}.
 - If none: italic "Não pertence a nenhum grupo ainda."
- **Seguindo** section (h4): list of followed users with circular avatar (32×32) + username.
 - Clicking a user → /profilepage/{id}.
 - If none: italic "Não está a seguir ninguém ainda."

11. Account Settings — /userpage

Two-panel layout with a left sidebar:

Left sidebar:

- User's circular photo (100×100) + username.
- Title: "Definições".
- Navigation buttons:
 - "Editar Perfil" (switches main content to profile section).
 - "Meus Grupos" (switches main content to groups section).

Main content — "Editar Perfil":

- Profile photo preview (circular 100×100).
 - Shows pending (not yet saved) preview with message "Pré-visualização — ainda não foi guardada."
- **Change photo**: file input. When a file is selected:
 - Shows "Guardar Foto" (save) and "Cancelar" buttons.
 - Feedback message after save attempt.
- When **"Editar"** button is clicked, enters edit mode with:
 - **Username**: input (disabled by default) + "Editar" button to enable → "Guardar" to save.
 - **Email**: same pattern.
 - **Password**: same pattern, with eye icon to toggle visibility between ** and plain text.
- Before clicking Edit: all fields shown as disabled inputs.

Main content — "Meus Grupos":

- Title: "Grupos Criados".
- Button: "Ir para o Gerenciador de Grupos" → /grouppage.
- List of groups (group cards):

- Group icon + group name (link → /grouppage/{id}).
 - Creator name.
 - Follower/member count.
-
-

12. Groups Manager — /grouppage

- Title: "Grupos".
- Two buttons at top: "**Criar Novo Grupo**" and "**Procurar Grupos**" (→ /searchgroup).

Create Group form (toggled by "Criar Novo Grupo"):

- Group Name (required).
- Tags field (comma-separated, optional).
- Invite members by email (comma-separated).
- "Create" (green) and "Cancel" (gray) buttons.
- Success/error messages.

User's Groups list:

- Each group item shows:
 - House icon + group name (bold, clickable → /grouppage/{id}).
 - "**Adicionar Usuário**" button.
 - If current user is admin: "**Excluir**" (red) button.
 - If not admin: "**Sair**" (yellow) button.
 - Expandable "**Membros do Grupo**" / "Esconder" toggle button:
 - Lists members with photo (40×40, clickable → profile) + username (clickable → profile).
 - Admin badge (green) if admin.
 - If current user is admin: "Make Admin" / "Remove Admin" button per member (except self).

Modal — Add User:

- Email input + "Verificar" button.
- If user found: shows their photo and username + "Confirmar" button.
- Error if user not found or already in group.

Modal — Confirm Admin Change:

- Confirmation text + "Confirmar" (red) and "Cancelar" (gray) buttons.
-
-

13. Group Detail — /grouppage/{id}

- Title: "Detalhes do Grupo".
- Group name in card header.
- Group description (if any).
- Members list: circular photo (40×40) + username + admin badge (green) if admin.
- "**Eliminar Grupo**" button (admin only, red).

- "Sair do Grupo" button (gray).
-

14. Group Chat (already working in another branch — must be included)

The group chat uses **SignalR** for real-time messaging. Each group has its own chat room.

- The chat interface should be accessible from within the group detail page (or as a tab/panel on `/grouppage/{id}`).
 - Layout: chat bubble list (scrollable) + message input at the bottom + send button.
 - Each message shows: username, message text, timestamp.
 - Messages are real-time — new messages from other members appear instantly without page refresh.
 - The SignalR hub connects with a `groupId` query param and broadcasts to all members of that group.
 - Message model: `groupId`, `username`, `message`, `timestamp`.
-

15. Search Groups — `/searchgroup`

- Title: "Procurar Grupos".
 - Large search input: "Pesquisar por nome de grupo..." — filters in real-time as user types (searches by name starting with query).
 - Loading state: "A carregar grupos..." alert.
 - Empty state: "Nenhum grupo encontrado." alert.
 - Groups list:
 - House icon + group name (bold, clickable → `/grouppage/{id}`).
 - If not a member: "**Entrar**" (blue) button.
 - If already a member: "**Sair**" (yellow) button.
-

16. Favorites — `/favorites`

- Title: "My Favorites".
 - Grid of favorited recipe cards (2 per row):
 - Recipe image (left).
 - Recipe name (clickable → recipe detail).
 - Tag badges (blue pills).
 - Prep time and cook time.
 - Empty state: "You haven't added any favorites yet."
 - Loading state: "Loading..."
-

17. Category/Discover Page — `/categorypage` and `/categorypage/{categoryId}`

- Left mini-menu with icons: home, add, bookmark.
- Featured Italian Kitchen banner (large image with overlay text: "Sugerido para si...", "Cozinha Italiana").

- **Top Recipes this week** card: Top mais vistos, Top mais bookmarked, Top maior rating.
 - **Top Chefs this week** card.
 - **Related Groups** card (e.g., "Grupos Cozinha Italiana") with group links.
-

Data Models (for API integration reference)

User

- Id_User, Username, Email, Password, UserPhoto (stored as base64 data URL string)
-

Recipe

- Id_Recipe, Id_User, NameRecipe, Ingredients[], Prep_Time (in minutes), Cook_Time (in minutes), Preparation, Image (binary → display as base64), Servings, Difficulty (0=Fácil, 1=Médio, 2=Difícil), Tags[], AverageRating (decimal), FavoriteCount, PublishedDate, Username, UserPhoto
-

Group

- Id_Group, Name, Description
-

GroupMember

- Id_User, Username, UserPhoto, IsAdmin
-

GroupChatMessage

- Id_Group, Username, Message, Timestamp
-

Notification

- Id, RecipientUserId, ActorUserId, Type (Comment/Favorite/Follow/Rating/GroupInvite/GroupAdmin), Message, IsRead, CreatedAt
-

Tag

- IdTag, NameTag, IdCategory
-

Category

- IdCategory, Description
-

Comment

- IdUser, UserName, UserPhoto, Message, PublishedDate
-
-

Routing Summary

/	Landing (EmptyLayout)
/welcome	Welcome onboarding step 1 (EmptyLayout)
/uploadphoto	Upload photo step 2 (EmptyLayout)
/selectgroups	Select groups step 3 (EmptyLayout)
/feed	Global feed (MainLayout)
/feed/{tagId}	Feed filtered by tag (MainLayout)
/recipepage/{id}	Recipe detail (MainLayout)
/addrecipe	Create recipe (MainLayout)
/editrecipe/{id}	Edit recipe (MainLayout)
/deleterecipe/{id}	Delete recipe (MainLayout)
/myrecipes/{userId}	User's recipe list (MainLayout)
/profilepage	Own profile (MainLayout)
/profilepage/{userId}	Another user's profile (MainLayout)
/userpage	Account settings (MainLayout)
/grouppage	Groups manager (MainLayout)
/grouppage/{id}	Group detail + chat (MainLayout)
/searchgroup	Search groups (MainLayout)
/categorypage	Discover (MainLayout)
/categorypage/{id}	Category detail (MainLayout)
/favorites	Saved recipes (MainLayout)

Key UX Details

- **Time formatting:** minutes are displayed as "X min" or "X h" (e.g., 90 min → "1 h 30 min" or just "90 min" depending on implementation). The app stores everything in minutes internally.
- **Image handling:** recipe images are stored as `byte[]` and displayed as `data:image/jpeg;base64,{base64string}`. User photos are stored as base64 data URL strings directly.

- **Default fallbacks:** `default-avatar.svg` for missing user photos; `images.svg` for missing recipe im
